abhishek mj2004 ❖ 8904200564 ❖ Bangalore, IN ❖ [Portfolio](#) ❖ [Github](#) ❖ [LinkedIn](#)

summary

Full-Stack Developer specializing in FastAPI, Django, React.js, and AI-powered automation systems with experience in building scalable production-ready applications. Skilled in workflow automation using n8n, Gemini 1.5, CI/CD pipelines, Docker, Jenkins, AWS EC2, and modern full-stack technologies.

WORK EXPERIENCE

Netpy Technologies

Nov. 2025 –Present

Full-Stack Developer

Bangalore, IN

- Completed full-stack training while building an end-to-end Job Portal using Django and React.js technologies.
- Contributed to REIGC Real Estate CRM with scalable APIs, workflow automation, and role-based access.
- Worked on CI/CD pipelines, AWS EC2 deployment, Docker containerization.

Soomuch Smart Solutions Pvt. Ltd

Aug. 2025 –Oct. 2025

Backend Developer

Remote

- Learned backend development workflows, Agile practices, and team collaboration using Jira.
- Built and optimized FastAPI-based REST APIs while working on backend endpoint development.
- Debugged backend issues, tested APIs, and gained experience in deployment and project architecture.

PROJECTS

REIGC Real Estate CRM Platform

- Built a full-stack Real Estate CRM using React, TypeScript, Vite, Django REST Framework, and PostgreSQL for lead and deal management.
- Implemented JWT authentication, role-based access control, protected routes, and workflow automation using Celery and Redis.
- Developed dashboards, KPI reports, payment tracking, audit logs, compliance workflows, and Swagger APIs.

SmartDental AI Receptionist (Voice AI Booking System)

<https://smart-dental-reception.lovable.app/>

- Built AI-powered voice booking workflows using React.js, n8n, Gemini AI, and automated scheduling systems.
- Developed scalable full-stack integrations with real-time patient management and AI voice automation.
- Automated dental appointment workflows, reducing manual front desk operations and improving scheduling efficiency.

Job Portal – Full-Stack SDLC Implementation

<https://github.com/whyabhisheek/backend>

- Built a full-stack Job Portal implementing complete SDLC from requirement analysis to deployment.
- Developed RESTful APIs, responsive React UI, resume uploads, and real-time form validation features.
- Automated CI/CD pipelines using Jenkins, Docker, and Dokploy for scalable deployment workflows.

EDUCATION

S.E.A - College of Engineering & Technology

May 2026

Bachelor of Artificial Intelligence and Machine Learning

Bangalore, IN

- **CGPA:** 8.0

SKILLS

- **Languages:** Python, JavaScript, TypeScript, C, SQL
- **Frameworks:** React.js, Node.js, Express.js, FastAPI, Django REST Framework
- **Tools:** Linux, Docker, Git, Jenkins, AWS, GCP, VPS, CI/CD, PostgreSQL, n8n
